

The Science Club

Adopt a fish!

Join us for a fun and educational session every day! You will use the magic fish science kit, approved by the Ministry of Education, as a live material for

- A unique hands-on learning biological science: you will hatch and breed baby fish into colourful adult fish.
- Improve your knowledge: learn about species evolution & selection, animal reproduction & breeding, habitat & environment protection.
- Improve your practical skills: learn how to take measurements, use the results and formulate and address scientific questions!
- Learn the value of patient work and attention to details.
- Cultivate love for life, caring for the weak and protecting all forms of life.
- Cultivate sense of achievement and responsibility, team effort and free exchange of ideas & opinions.

What: hatch and breed your fish, ask questions and learn and exchange ideas with your teacher and friends, participate in competitions etc.

When: Monday-Friday afternoon (you can come at any time during the shop's opening hours)

Where: PJK, 42A Nikis Avenue, Nicosia (next to DHL, opposite to Burger King at Nikis)

How much: €9.99 per month per person

Who to join: anyone from 5 years old
