

## Summer Workshop: Magic Fish & Child Development

July 2 - September 7  
Monday - Friday, 2-3pm

A weekly workshop is organized for using the magic fish science kit, approved by Ministry of Education, as a live teaching material to offer participants:

- A unique way to learn biological science, by guiding children to hatch and breed baby fish into colorful adult fish
- Improve children's knowledge: learn about species evolution and selection, animal reproduction, breeding, habitat and environment protection
- Improve children's practical skills: learn how to take measurements, use the results and formulate and address scientific questions!
- Learn the value of patient work and attention to details
- Cultivate love for life, caring for the weak and protecting all forms of life
- Cultivate sense of achievement and responsibility, team effort and free exchange of ideas & opinions.

**Cost: €49.99**

(children keep their fishes after the workshop and take them home!)

**Venue:** Galaxias Center Office 501, 33 Arch Markarios Ave, Nicosia
