RE: Educational Toy ‘The Magic Fish’

Dear Dr. Ioannides,

I have instructions to refer to your letter on the above matter, dated 10 September 2010, and to inform you that after studying the specific educational pack and testing its efficacy as part of an organized educational process, it is evaluated as suitable for use by teachers and pupils of elementary schools. It has been concluded that the pack augments the educational process and creates the prerequisites for experiential laboratory learning.

2. In the framework of decentralisation and autonomy of educational units that the Ministry of Education and Culture promotes, each school is free each time to select activities that best serve the objectives set by the school unit. For this purpose you may contact the elementary schools and inform them about the specific pack. The postal and email contact information of the schools can be found at the website of Ministry of Education and Culture: <http://www.moec.gov.cy> (Educational System → Elementary Education→ School Catalogues).

3. The department of Elementary education remains at your disposal for any additional information

Sincerely,

(Elpidoforos Neokleous)

For Director, General
