

# Approved by the Ministry of Education

## Special offers to schools using Magic Fish for in-classroom science projects

- Magic Fish kits at discounted price
- Live demonstration of how to hatch baby killifish & baby food (sea monkeys)
- Free in-class lectures on species evolution & selection, animal reproduction & breeding, habitat and environment protection and more

### Magic Fish and Child Development:

- A live teaching material offers a unique way to learn biological science, by guiding children to hatch and breed baby fish into colorful adult fish.
- Improve children's knowledge and skills: learn how to take measurements, use the results and formulate and address scientific questions!
- Learn the value of patient work and attention to details.
- Cultivate love for life, caring for the weak and protecting all forms of life.
- Cultivate sense of achievement and responsibility.
- Cultivate team effort and free exchange of ideas & opinions.
